

We have already started taking signature from all residents of the immediate area. this will be sent to the FCC office in Washington DC to let them know that we do not want anyone call our house to sell us shit we don't need or can not afford. I thought the reason we have 10 malls in a square block is so that we can go find what we need. The last year as been great without the constant baggering of some use car salesman trying to sell me a can I don't need. Thank you for keeping the do not call policies intact.
